CODES

100 SECRET CODES TO LEARN ANYTHING

ChatGPT learns the way you do

"Type one code and your topic. ChatGPT does the studying with you."

Original codes by @sabrina_ramonov
Shared by Stefanie Zucker

How to use these

Pick a code, type it anywhere in your prompt, and add your topic. That is the whole trick.

FOR EXAMPLE

```
QUIZME — photosynthesis
```

- Add your class notes, a pasted article, or the actual question for a more focused answer.
- Stack two codes in one prompt when it helps — FEYNMAN-TECHNIQUE then QUIZME is a proven pairing.
- The first 10 are hers, in the order from the video. The other 90 are built on the same idea.
- Works in any chat AI — ChatGPT, Claude, Gemini. The code carries the teaching method, not the app.

The 10 from the video

Each one is one typed code away.

1	`ELI5`	Explain this in the simplest words possible.
2	`80/20`	Skip to the 20% of this topic that does 80% of the work.
3	`MAKE-STICKY-NOTES`	Turn the key facts into a visual sticky-note guide.
4	`FEYNMAN-TECHNIQUE`	Explain it in simple words until the gaps stand out.
5	`MAKE-MINDMAP`	Map the main ideas and how they connect.
6	`QUIZME`	One question at a time, until you actually understand.
7	`MAKE-VISUAL-STUDYGUIDE`	Build a one-page study sheet with the main points.
8	`FIRSTPRINCIPLES`	Break it down to the base ideas, then build it back up.
9	`SOCRATES`	Teach me by asking me questions, one at a time.
10	`MAKE-SCHEMATIC`	Draw a schematic of how the parts fit together.

100 Secret Codes to Learn Anything

Understand it deeply

Codes that force the idea into shape before you memorize anything.

- **ANALOGY** Explain it through something I already know well.
- **TEACH-BACK** I explain it, you grade me like a professor.
- **SIMPLIFY-THEN-DEEPEN** Plain version first, then add the depth back one layer at a time.
- **CONCEPT-LADDER** Build me a ladder from what I know to this hard idea.
- **COMPARE-CONTRAST** Explain it against the thing I always confuse it with.
- **MISCONCEPTION-CHECK** Tell me what people usually get wrong about this first.
- **SELF-EXPLAIN** Make me explain each step, then correct me.
- **KNOWLEDGE-TREE** Map what this rests on and where it leads.
- **WHY-CHAIN** Ask why five times until we hit bedrock.
- **INTUITION-FIRST** Build my gut feeling for this before any formulas.
- **EDGE-CASES** Show me where this rule breaks.

Study and actually remember

Codes built on how memory really works.

- **ACTIVE-RECALL** Close the book and interrogate me on it.
- **MAKE-FLASHCARDS** Make Q&A flashcards I can drop into Anki or Quizlet.
- **SPACED-REPETITION** Turn this into a day 1, 3, 7, 14 review schedule.
- **MNEMONICS** Build memory hooks for the facts I keep forgetting.
- **MEMORY-PALACE** Walk me through placing these facts in a mental palace.
- **BLURT** I write everything I remember, you mark what I missed.
- **LEITNER-BOX** Sort these into a five-box review system.
- **INTERLEAVE** Mix these three topics into one practice session.
- **CLOZE-TEST** Blank out the key words and make me fill them in.
- **RETRIEVAL-LADDER** Start with what I know, pull the rest out with questions.
- **SLEEP-ON-IT** What should I review tonight for tomorrow to stick?

100 Secret Codes to Learn Anything

Read smarter

Codes for articles, textbooks and papers you paste in.

- **TLDR** Dense summary of this text, no fluff.
- **KEYTERMS** Pull out the vocabulary and define each term.
- **READ-LIKE-A-PROFESSOR** Annotate: thesis, evidence, and what is missing.
- **EXAM-QUESTIONS** Turn this chapter into exam questions.
- **LEXILE-LADDER** Rewrite this at three difficulty levels so I can climb it.
- **ARGUMENT-MAP** Map the claims, evidence and assumptions.
- **STEELMAN** Give me the strongest version of the argument I dislike.
- **READING-PLAN** Split this long text into a week of focused reads.
- **CROSS-EXAMINE** Ask me questions about this text until I prove I read it.

Exam prep

Codes for the two weeks when it counts.

- **PAST-PAPER** Make past-paper-style questions with mark values.
- **MARK-SCHEME** Grade my answer like an examiner, show where marks were lost.
- **RUBRIC** Build a marking rubric for this assignment.
- **TIMED-DRILL** Rapid-fire questions with a time target per question.
- **WEAK-SPOTS** Here are my last wrong answers. Find the pattern.
- **PREDICT-THE-EXAM** The ten most likely questions, and why.
- **FORMULA-SHEET** One page of the formulas and facts I need.
- **ERROR-LOG** Turn my mistakes into a targeted study plan.
- **ONE-PAGE-CHEAT** Compress the whole course onto one page.
- **NIGHT-BEFORE** Triage plan for the night before the exam.
- **MARK-BOUNDARY** What separates a B answer from an A answer on this?

Math and problem solving

Codes that make it show its work.

- **STEP-BY-STEP** Solve it showing every step. No skipping.
- **SOLVE-3-WAYS** Solve it three different ways and compare.
- **ESTIMATE-FIRST** Make me estimate the answer before solving.
- **SANITY-CHECK** Is this answer plausible? Prove why or why not.
- **WORKED-EXAMPLE** Generate a fully worked example of this problem type.
- **SYMBOL-TRANSLATOR** Translate this notation into plain English.
- **UNGUIDED** Let me struggle first, then debrief my attempt.
- **FIND-MY-ERROR** Here is my work. Find where it went wrong without fixing it.
- **INTUITION-CHECK** Quiz my gut instinct on answers before I calculate.

Skills and practice

Codes for learning by doing, not by reading.

- **DELIBERATE-PRACTICE** Build a plan that attacks the edge of my ability.
- **20-HOUR-PLAN** Rapid skill-up plan: 20 hours from zero to functional.
- **DRILL-MAKER** Generate ten drills for this skill.
- **CRITIQUE-MY-WORK** Review this against professional standards.
- **FEEDBACK-LOOP** I do, you critique, we repeat with focus.
- **PROJECT-BASED** Teach me this skill through one real build.
- **COPYWORK** Reproduce this master's work with me so I learn the patterns.
- **PRACTICE-PARTNER** Roleplay an interview, pitch, or negotiation.
- **SKILL-DECAY** What will I forget first, and how do I keep it?
- **GRADING-SWAP** We grade each other's attempts at this exercise.

Language learning

Codes for absorbing a language instead of studying it.

- **COMPREHENSIBLE-INPUT** Write me a story at my level, just slightly above.
- **SHADOWING-SCRIPT** Sixty-second script with pause marks for shadowing.
- **SPACED-VOC** A twenty-word set for today, with review timing.
- **GRAMMAR-DRILL** Targeted drills on this one grammar point.
- **CONVO-PRACTICE** Roleplay the conversation. Correct me after, not during.
- **TRANSLATE-THEN-EXPLAIN** Translate it, then explain why the grammar did that.
- **NATIVE-REWRITE** Rewrite what I said the way a native would.
- **LISTENING-LADDER** Describe what to listen to at my level this week.

Writing and thinking

Codes that make the argument hold up.

- **OUTLINE** Thesis-first outline that argues back at me.
- **RED-TEAM** Attack my argument and show me the holes.
- **COUNTERARGUE** Strongest objections, and my best replies.
- **EVIDENCE-CHECK** Ask me for the source behind every claim.
- **EDIT-LIKE-AN-EDITOR** Line edit this for clarity, then explain the cuts.
- **TEN-WORD-TEST** Compress my point to ten words. If it cannot, the thinking is fuzzy.
- **SOCRATIC-ESSAY** Build the essay by questioning me first.
- **DEFINITION-DRILL** Make me define my key terms, then test the definitions.
- **AUDIENCE-SWAP** Rewrite this for a skeptic, then for a friend.

Plan the learning itself

Codes for the meta level: knowing what to learn and when.

- **CURRICULUM** Four-week course from zero to this goal.
- **SEVEN-DAY-PLAN** Day-by-day plan with time boxes.
- **ASSESS-ME** Ten-question placement test before we start.
- **MILESTONE-CHECK** Quiz me against where I should be by now.
- **PROGRESS-REPORT** Read my learning journal and tell me the trend.
- **LEARNING-JOURNAL** Give me a five-minute daily log format.
- **FOCUS-PLAN** Plan a 25-minute session I can start right now.
- **DEPENDENCY-MAP** What to learn first, second, third, and why.
- **HOBBY-TO-JOB** Map this skill to what people actually get paid for.
- **TEACH-MODE** Be my tutor. Plan today's lesson from where I am.
- **DEADLINE-RESCUE** I have this long and this much time. Ration it.
- **STUCK-PROTOCOL** I am stuck. Walk me out of the hole step by step.
